

# PM LDPE FOILS

PM LDPE FOILS offer optimal long-term protection for your products. They are versatile enough for use in many applications and are suitable for both professionals and do-it-yourselfers alike.

### Transparent

The quality foil, made of new, selected raw materials, is highly transparent, and stands out for its highly advantageous mechanical properties and easy handling. In addition, it is environmentally safe and groundwater-neutral.

### Translucent and black

PM LDPE FOILS are available in translucent and black. They offer universal use, and offer the best possible protection against wind, rain, dust and other environmental influences. PM LDPE FOILS are manufactured of 100 % recycled materials, and make an effective contribution to environmental protection.

### Technical Data

Material	LDPE
Chemical formula	C <sub>2</sub> H <sub>4</sub> N
Colour	Transparent, translucent, black
Thickness*	0.018 mm to 0.500 mm
Width*	2 / 4 / 6 m
Length	25 / 50 m
Temperature range	-40 °C to +80 °C
Properties	Solvent-free, physiologically harmless, groundwater-neutral
Packaging	on Euro pallets or by agreement

\*Other thicknesses and widths available upon request.

# INSTALLATION INSTRUCTIONS

### Installation

PM LDPE FOILS are suitable for universal applications, simple to use, and offer optimal protection against wind, rain, dust and other environmental influences.

They are groundwater-neutral and free from solvents – making them completely harmless from an ecological perspective. LDPE FOILS offer extremely good stability and can handle heavy loads.

They are used for covering tasks on construction sites, for instance as a privacy screen or dust shield.

These construction foils are also used as underlays in scaffolding construction or as a vapour barrier in floor areas. PM LDPE FOILS can be used under screed, to secure mounds of earth / pits, as winter protection for shell construction, to cover objects during painting or plastering work, or to cover wood. They are also ideal for covering large floor slabs while smoothing concrete or to prevent fresh concrete from drying out too quickly.
